Bud Booster

Bud Booster is an original bloom additive from Green Planet which, because of its high level of phosphorus, helps promote blooming and assists in the plants metabolism during the middle of the flowering stage. Bud Booster simply put is a flower enhancer generally used by entry level gardeners to achieve a larger, heavier crop. This extremely cost effective product will increase the size and density of flowers by using powdered phosphorous and potassium.

60g, 500g, 1Kg, 2.5Kg, 10Kg

Dense

Dense Bud Compactor provides the potassium which is needed in relatively large amounts to support the various plant functions critical for huge yields. Potassium is vital in the activation of more than 80 plant enzymes that regulate various functions including the opening and closing of the stoma, necessary for proper gas exchange and water usage. Potassium is also very important in the utilisation and conversion of phosphorous into an energy source.

60g, 500g, 1Kg, 2.5Kg, 5Kg

Karbo Boost

Karbo Boost is an exciting product available only from Green Planet Nutrients and provides great value combined with amazing results. Green Planet have taken research from various studies along with customer feedback and created a custom blend of simple and complex carbohydrates that match the natural carbohydrate profile found within the plant. Karbo boost is a performance enhancing carbohydrate, which acts as a great food source for anyone using beneficial microbes.

30g, 600g, 1Kg, 2.3Kg, 11.34Kg

Massive Bloom

Massive Bloom Formulation is the worlds best flowering additive. A high performance, organically derived flowering cycle nutrient, enhanced with all the necessary micro elements including naturally occurring hormones. Massive Bloom increases flower size, improves taste, benefits plant health and provides larger crops and yields. Massive incorporates naturally occurring gibberellic hormones designed to increase inter-nodal spacing allowing more room for the flowers to mature and swell to their full potential.

Liquid Weight

Liquid Weight is a blend of simple and complex carbohydrates along with proprietary extracted triacontinol, yucca extracts, bio-available amino acids, ascorbic acid and low molecular weight humic acid. These ingredients are what give your plants the natural ability to produce their own carbohydrate supply.

Liquid Weight is an excellent carbohydrate supplement that provides an added energy source for your plants, resulting in huge fruits and flowers. Beneficial carb sources support both your plant directly and act as a food source for the microbial life in the root zone. This leads to an increased absorption of essential nutrients and growth stimulants such as triacontanol.

Medi One

Medi One is a multi award winning one-part, start to finish, all natural 100% organic nutrient. It is formulated from all natural ingredients for use in organic gardening. It contains soluble hydrolysed fish extract from Atlantic Menhaden that are slowly steamed and hydrolysed to preserve the amino acids. These are blended with North Atlantic Kelp extract and mined potassium sulphate to provide additional nitrogen, phosphorus and potassium (N-P-K). Natural humate complexes are also added to increase the overall balance in this high quality liquid organic fertiliser.
